

WATER NOTICE

The last week of February, Vandenberg Village CSD will start work on a project to rehabilitate the 500,000 gallon raw water tank at our water treatment plant. The tank will be out of service for about three months.

During this time, our operations staff will be using a different well and adjusting chlorine levels as necessary.

You may notice a slightly higher chlorine odor and an increase in hardness, from 20 grains per gallon (now) to 27 grains per gallon (during the project).

Customers with self-regenerating water softeners may want to contact their representative for details on adjusting softener settings. Customers with exchange-type water softeners may have to exchange their canisters more often.

If you have any questions, please call us at (805) 733-2475.
